MAY, 1991 FIXED PRICE LIST #0032

WE OFFER THE FOLLOWING TERMS OF SALE

1. All Coins GUARANTEED Genuine - This is a LIFETIME Guarantee!
2. All attributions are guaranteed correct - also LIFETIME Guarantee!
3. The IDENTIFIED POPULATION estimates (RARITY) of varieties change as more pieces of Copper are attributed, and it is IMPOSSIBLE to have an ACCURATE rating! But, we do use the most up-to-date data available - as reflected in "Copper Quotes by Robinson". (COR)
4. STRICT ANA & EAC guidelines are used in grading, which consist of assigning a grade based on the state of preservation/wear of the piece. We then describe the condition of the coin so that you will have as good an idea as possible of what the coin looks like without actually being able to see it in person. It is our intent that there be NO SURPRISES when you receive the coin. Virtually all old Copper has accumulated some marks in their lifetime since leaving the Die/Mint - It is our intent to describe any such marks of significance. We now introduce a new term - VALUE GRADING!!

   Sharpness Grade is far easier to describe in consistent terms, and where there may be circulation defects such as porosity, gouges, rim dinges/nicks/bruises, corrosion and other such detractions, arriving at a NET GRADE is certainly subjective at best. The grade that we have assigned on the first line describing each coin is intended to represent this NET GRADE/VALUE GRADE.

   If the Second Line does NOT start with a Sharpness grade, then it is our opinion that the NET GRADE of the coin is the SAME AS the SHARPNESS GRADE of the coin, and that there are NO SIGNIFICANT defects worth mentioning. Perhaps NOT PERFECTION, but whatever marks or other elements that may be present, do not deduct from the over-all appearance/grade of the coin, and are mentioned for accuracy.
5. A Full 30 DAY return privilege is allowed for any or no reason. Our business is based upon attracting repeat customers, and it does none of us any good for you to keep a coin with which you are not completely satisfied. The 30 day period is an approval period, and we welcome any of our customers to show their purchases from us to any other EXPERIENCED EAC member for another opinion. Sales are final after the 30 day period, but we will certainly consider extensions in this time limit upon any reasonable request.
6. All coins are guaranteed to meet ANACS certification for grading! Any coin graded lower by ANACS can be returned within 120 days for immediate refund of the full purchase price plus all ANACS certification service fees.
7. All orders are sent postpaid.
8. Approval service is available to established clients with 7 day terms.

We are always interested in buying Early Copper & Type Coins! If you have coins to sell, we would be happy to have you contact us. We are willing to PAY STRONG PRICES for NICE coins. We will also accept coins on a consignment basis at a reasonable commission. Please feel free to contact either of us with ANY questions that you may have.

I have just returned from a very active EAC convention in Boston and the central States convention in St. Louis. The last two months have brought some great Early Copper my way and it is offered to you here.

In this catalog you will find a beautiful group of choice New Jersey Cents, a collection of nice Half cents with especially choice early dates. Also an exceptional offering of 1824 and 1831 Cents by variety including a choice EF 1831 N-14. Several outstanding rarities are offered including examples of 1803 S-264 the Large Date Small Fraction variety, 1800 S-210 in a rare early die state, 1818 N-4, 1827 N-12, 1830 N-11 and 1835 N-19 are among the better middle dates. Also many condition census level coins are offered, 1794 S-25, 1820/19 N-3,1846 N-14, 1847 N-32, and 1848 N-3 and N-13 among them. I hope you will find something of interest.

Bob Grellman and I will be holding our second all copper sale at the time of the ANA in Chicago. The sale is tentatively scheduled for Friday night, August 16th, at the Holiday Inn across from the convention center. I will be accepting consignments for the sale up until the end of June. We already have some great coins consigned. It looks like we will also be holding the sale for Paul Padget's Cincinnati show at the end of September so begin making plans.

I will be attending The Long Beach convention May 30- June 2, Dallas June 13-15, ANA in Chicago August 13-18. Hope to see you.

COMMENTS

The new issue of Copper Quotes by Robinson came out just prior to EAC in Boston and as they say, "You've come a long way baby!". I remember the first mimeographed "Copper Quotes" that came out about eight years ago. It covered only early dates and was a hugely ambitious step at the time. The audacity of ascribing values to rare varieties that hadn't even traded hands in years! It was like walking into a firestorm with a squirt gun. There were a lot of angry people. Mostly those who had been having a pretty good time of it buying rare coins very cheaply; and those others who had been selling the same coins at hugely inflated prices, and those others who had been doing both. Well, it ain't no squirt gun anymore. CQR has changed dramatically over the years. It now lists all dates and varieties of Half Cents and Large Cents.

1793-1857 in three categories of condition or desirability. It lists condition census data for all dates and varieties. No publication, no tool of any kind has been as useful or as influential as CQR has been over the past several years. Its purpose has largely remained the same.

To educate.

To educate collectors, to educate dealers, to educate whoever was willing to sit still long enough to digest the information CQR contains. In this CQR has been most successful. Still there is a tendency to lose sight of the avowed purpose of CQR. I quote from the April 1, 1985 issue. "Copper Quotes by Robinson (CQR) is proud to publish, as far as we are able to determine, the First consolidated listing of virtually all varieties of Half Cents and Large Cents by various circulated grades with their estimated market values. Albeit, the close observer may notice that some sub-varieties and/or many die-states may not be represented, but I am not making the claim that this publication is all and everything you would ever want to know about Early Copper. It is intended to provide a guide, not only for the beginning collector, but to also offer a quick point of reference for the very advanced collector as well.....

The values shown are intended to represent the approximate current market value of coins that would support a Grade NET OF ANY DEFECTS present on the coin, USING EAC GRADING STANDARDS!!!!Such a grade USUALLY DOES NOT CO-INCIDE with the SHARPNESS of the coin. The potential buyer/collector must be aware that there are significant differences in value based upon eye-of-the-beholder evaluations of defects that will strongly effect MARKETABILITY of the coin. VALUE is

a subjective issue, and no one can state, with any real authority, that the VALUE is in all cases equal to the MARKET PRICE of any coin." One thing Jack alludes to is the subtle difference between value and marketability. In fact CQR values are really a hybrid of the two. The values are taken in large part from real transactions at auction or private treaty. These results usually reflect some influence of the marketability factor. But what is crucial to understand is that while value may remain essentially the same, the marketability may change drastically. What is the value of a rare die state of a middle date large cent? It is partially determined by several factors. First the rarity of the die state. Is it a state of a rare variety or a rare state of a common one? What is the grade and general desirability of the coin? Who cares? This last may sound cavalier but while all these things and others as well must be taken into consideration the last is by far the most important. If you have a rare die state of an 1803 C-3 Half Cent, let's say an early state in G5, mostly no one cares. Now if it were a rare state of 1804 C-6, say a state I or state II, many people would care because there are many collectors of 04 C-6 by die state. The rare state of 04 C-6 is many times more "valuable" than the 03 C-3 because of its popularity. And the" price" one brings is disproportionate to the other because of its increased marketability. The most important factor in determining the value/price of a coin is WHO wants it!

We saw this dramatically illustrated in the Dennis Mendelson sale. Rare die states that Dennis fought tooth and nail for in the JHR sale brought less because Dennis wasn't pursuing them, and the underbidder at JHR was absent! So the prices drifted back to the next eschelon of players at substantially lower levels. Similarly, when large numbers of collectors suddenly enter a new area of the market it drives up prices. Many collectors now concentrate on Late Date varieties. They are doing so for many and complex reasons. But the result is that many Late Date varieties of speculative long term rarity and value now bring prices disproportionate to what I believe their real value will be. Is a high grade specimen of a rare variety of 1850 worth as much as a similar grade and rarity of a cent of 1794? Of course not. But they may bring the same price under certain market conditions. Certain dates are more popular than others. For the past several years 1829 has been a favorite among middle date collectors. I recently sold the fifth finest known 1829 N-9 for close to three thousand dollars; it previously had brought close to four thousand. I now have the fifth finest 1828 N-12; it's for sale for less than $500. A little out of proportion right? Still the 1829 will probably always remain many times more desirable than the 1828. Why? Well, many reasons. 1828s are hard to attribute. With the exception of the small date they all look

pretty much the same. 1829s starting with the medallic looking 29 N-1 and ending with the small filled letters reverse N-9 all look dramatically different. There will always be more interest in the 1829s. We see the same thing happening in Late Dates. 1847s have a number of neat recut dates, overdates, rim cuds and die breaks. They are easily attributable and thus popular. 1851s take an hour of spare time and a sixteen power magnifying glass just to attribute. Which will be more valuable in a few years time?

More important to each individual collector will be what what he or she finds interesting and desirable. Decide for yourself what you find most value in, what you get the most enjoyment from, and pursue that. As you find yourself more comfortable in your own chosen numismatic itinerary you will find CQR to be more and more a helpful guide.
